

SANCHIT CHAUDHARY

Delhi, India | sanchit.chaudhary.ug23@nsut.ac.in | 9582628961 | [LeetCode](#) | [GitHub](#) | [LinkedIn](#)

PROFESSIONAL SUMMARY

Information Technology undergraduate with hands-on experience building full-stack Machine Learning platforms (Python, FastAPI, React) and AI-driven products. Skilled in automated model training and evaluation (XGBoost, LightGBM, Random Forest), LLM integration, REST API development, and secure application architecture, with proven delivery in enterprise consulting environments at EY.

TECHNICAL SKILLS

- Languages: Python, JavaScript (ES6+), Java, C++, C, SQL
- Machine Learning & AI: XGBoost, LightGBM, Random Forest, Optuna, scikit-learn, LLM Integration (OpenRouter/DeepSeek V3, Ollama Llama 3), Feature Engineering, Hyperparameter Tuning, Model Evaluation
- Frameworks & Libraries: React 19, FastAPI, Node.js, Express, Spring Boot, Tailwind CSS, Bootstrap, MVC
- Databases: MySQL, PostgreSQL, MongoDB, SQLite, Supabase SQL
- Tools & Platforms: AWS, Docker, Git, GitHub, Jenkins, JUnit, RESTful APIs, JWT Authentication, RBAC
- Core Concepts: Data Structures & Algorithms, Object-Oriented Programming, Microservices, Operating Systems, Computer Networks

PROFESSIONAL EXPERIENCE

Data & AI Intern — EY

May 2026 – Jul 2026

Gurugram, India

- Engineered a full-stack ML platform (Python, FastAPI, React) automating model training, Optuna hyperparameter tuning, and evaluation across XGBoost, LightGBM, and Random Forest.
- Designed an automated target-recommendation engine using correlation and cardinality heuristics, with cyclical sine/cosine date encoding and data-leakage filtering.
- Built a multi-threaded async training queue, an SQLite run-history logger, and custom RBAC middleware for API authorization.

Software Engineering Intern — EY

Jun 2025 – Jul 2025

Noida, India

- Developed and optimized ABAP reports, ALV grids, and interactive lists to improve visibility into core business processes.
- Built and customized SAP Smart Forms and SAP Scripts to automate print layouts and document generation.
- Designed and maintained Data Dictionary objects (tables, views, domains, data elements) to support a robust, scalable data model.

ACADEMIC PROJECTS

Assessly — AI-Powered & Proctored Mock Interview Platform

React 19, Node.js, Express, MongoDB, OpenRouter (DeepSeek V3), Deepgram STT, MediaPipe, Docker, Razorpay, Tailwind CSS

- Built a full-stack voice-AI interview platform delivering real-time, AI-driven mock interviews with instant audio and text feedback.
- Integrated Deepgram speech-to-text and OpenRouter (DeepSeek V3) LLM APIs to generate dynamic, context-aware interview questions in real time.
- Engineered a MediaPipe Face Mesh proctoring system for head-pose/eye tracking, and integrated Razorpay for tier-based subscriptions with JWT-secured, rate-limited APIs.

Hospital Service Locator & AI Healthcare Platform

React 19, Vite, Tailwind CSS v4, Ollama (Llama 3), i18next, Supabase SQL, Lucide React, JavaScript (ES6+)

- Built a responsive healthcare platform enabling users to compare diagnostic procedure costs (MRI, CT, X-Ray) and view real-time clinic wait times, with end-to-end appointment booking.
- Implemented Ollama Llama 3 with function calling to power a natural-language assistant querying live database records for accurate, zero-hallucination pricing and slot availability.
- Built multi-language support (5+ languages), OCR lab-report parsing, family health-profile management, and an admin dashboard for hospital managers.

EDUCATION

Netaji Subhas University of Technology — B.Tech, Information Technology

2023 – 2027

- CGPA: 7.00 / 10

Greenway Modern School — AISSCE / ISC (Class XII)

2022

- Percentage: 91.2%

Greenway Modern School — AISSE / ICSE (Class X)

2020

- Percentage: 93.6%

ACADEMIC ACHIEVEMENTS & AWARDS

- Qualified JEE Advanced after scoring in the 99th percentile in JEE Mains among 1.1M+ candidates.
- Winner, Wreckathon 25 — college-level hackathon.
- Data Analytics with Python — NPTEL Certification, Elite grade.

LEADERSHIP & POSITIONS OF RESPONSIBILITY

Execomm Member — The Debugging Society of NSUT

Nov 2023 – Present

- Contributed to planning, coordination, and execution of major college technical and cultural events.
- Collaborated with a 20+ member team to organize events reaching 1000+ student participants across Delhi NCR.

Team Lead — Volship India

May 2024 – Aug 2024

- Led a team of 10 fellows to design and implement community-driven projects, coordinating with local partners and stakeholders.
- State-level Under-19 Basketball Player, competitive debater, and volunteer educator for Grade 9–10 students from underprivileged backgrounds.
